PROFESSIONAL SUMMARY

B.Sc. CS student (2023–26) at Mumbai University with hands-on experience in full-stack Android development and 3D game engineering. Built a production-grade Smart Attendance System (Java, Firebase) with role-based access control, and a mission-based 3D game (Unity, C#) with custom AI behaviour. Interned at KRCL, gaining exposure to enterprise SQL, SDLC, cloud architecture, and ISO 27001 security standards. Actively learning ethical hacking and network security.

PROFESSIONAL EXPERIENCE

IT Intern | Konkan Railway Corporation Ltd. (KRCL)

Mar 3 – Mar 14, 2025

- ▶ Designed and queried relational databases using SQL; gained practical exposure to schema optimization in an enterprise environment.
- ▶ Studied enterprise software lifecycle using Angular and Spring REST API frameworks within a structured corporate SDLC.
- ▶ Learned Cloud service models (IaaS, PaaS, SaaS) and cybersecurity compliance under ISO 27001.
- ▶ Explored Linux server architecture, user permission management, and large-scale system administration practices.

PROJECTS

Smart Attendance System — Java · Android Studio · Firebase Realtime Database

- ▶ Built a complete Android attendance management app with dual-role login — Principal Dashboard and Teacher Interface.
- ▶ Implemented secure Firebase Authentication and real-time data sync ensuring 100% live attendance updates across devices.
- ▶ Designed Principal-controlled teacher account creation/deletion flow with role-based access control.
- ▶ Engineered clean UI/UX for both roles with responsive layouts and intuitive navigation.

Zombie Slayer (3D Game) — C# · Unity Engine · URP

- ▶ Engineered a mission-based 3D shooter with custom Zombie AI using behaviour scripting for dynamic enemy encounters.
- ▶ Optimised graphics rendering pipeline via Universal Render Pipeline (URP) for stable performance on mobile and PC.
- ▶ Built 3D character controllers, physics interactions, and wave-based level progression system.

TECHNICAL SKILLS

Languages	Java · C# · Python · Kotlin · SQL · JavaScript · HTML · CSS · Bootstrap
Android Dev	Android Studio · Firebase Realtime Database · Authentication · UI/UX Design
Game Dev	Unity Engine · C# Scripting · AI Behaviour · URP · Performance Optimisation
Tools	Git · GitHub · Database Design & Optimisation
Security	Ethical Hacking (learning) · ISO 27001 · Network Security Fundamentals

EDUCATION

Bachelor of Science in Computer Science

SGPA : 6.27

2023 – 2026

Mumbai University, Maharashtra

ADDITIONAL INTERESTS

- ▶ Cyber Security — actively studying Ethical Hacking and network security; completed foundational modules.
- ▶ Content Creation — manage a YouTube channel focused on live streaming and community engagement.
